## DETAILED ACTION

### *Allowable Subject Matter*

Claims 1-14 and 32-41 are allowed.

The following is an examiner's statement of reasons for allowance.

The prior art of record does not teach or suggest, singularly or in combination at least the limitation of claims 1, 9, 12-13, 32 reciting a copper base layer, a diffusion barrier in contact with the copper base layer, the diffusion barrier of a metal alloy comprising boron and phosphorus and a wetting layer on top of the diffusion barrier. And claims 1 and 32 recite the limitation of the diffusion barrier comprising one of CoB and NiP. Claim 12 recites the limitation of an Al layer between the adhesion layer and the seed layer.

The prior art of record does not teach or suggest, singularly or in combination at least the limitation in claim 5 "the base layer metal comprising Cu; a diffusion barrier in contact with the first conducting layer, wherein the diffusion barrier comprises a metal alloy comprising boron and phosphorus; a wetting layer on top of the diffusion barrier; wherein the base layer metal comprises an adhesion layer and a seed layer, wherein the seed layer comprises Co, wherein the base layer metal further comprises a metal layer positioned between the adhesion layer and the seed layer, wherein the metal layer comprises Al."

The prior art of record does not teach or suggest, singularly or in combination at least the limitation in claim 41 "a base layer that is connected to circuitry in the substrate, the base layer comprising a conducting interconnect that includes copper, an adhesion layer, a seed layer, and an aluminum layer between the adhesion layer and the seed layer."
